

System Restore Backup Folder

System Restore Folder.

Most users of Windows ME and XP know about the “ System Restore “ feature. The restore files can be backed up on a CD.

The location on the C: Drive is shown below. (Fig.SysRest-01.bmp)

NOTE: If the folder will not expand, double click on folder.. [*_restore{4781E024-A4AC-4DC3-9BA7-1B215409473A}*]
(See Fig.SysRest-03.bmp)

If your not familiar with Windows Explorer and copying files, see link's

Backing Up & Restoring The Folder:

To backup the folder, copy the folder.. [*C:\System Volume Information*] to a CD or storage device of your choosing.
To restore to the hard drive, copy from the CD storage device to the Root drive (DRIVE_C) on the hard drive.

The individual restore points are in the sub folders...) See Fig.SysRest-02.bmp)

NOTE: The date of folder [*snapshot*] corresponds to the date of the restore point.
